Proposed review date:	September 2026		

REVIEW SHEET

[illegible]

Statement of intent

SwitchED2 is committed to promoting a whole school approach to health care, welfare and wellbeing and the safe management of those members of our school community who live with specific allergies. We believe that all allergies should be taken seriously and dealt with in a professional and appropriate way. By our actions we will work proactively to:

- minimise the risk of exposure within the school setting
- encourage self-responsibility
- learn avoidance strategies
- have robust plans for an effective response to possible emergencies
- ensure inclusivity for all pupils

Equalities statement

Our school is clear about the need to actively support pupils with medical conditions to participate in school life.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely in all aspects of school life.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

Context

Food allergies are increasing in both developed and developing countries, especially in children and the severity and complexity of food allergy is also increasing. Food allergy can be fatal and an appropriate diagnosis is essential in parallel with the need for clear food labelling worldwide.

Around 5-8% of children in the UK live with a food allergy and most school classrooms will have at least one allergic pupil. These young people are at risk of anaphylaxis, a potentially life-threatening reaction which requires an immediate emergency response. 20% of severe allergic reactions to food happen whilst a child is at school and these reactions can occur in children with no prior history of food allergy. It is essential that staff recognise the signs of an allergic reaction, symptoms and are able to manage it safely and effectively.

Schools have a legal duty to support pupils with medical conditions, including allergy.

Principles

- To comply with all relevant environmental legislation, regulations and requirements.
- To encourage proactive steps to keep pupil/pupils safe.
- To ensure pupils from diverse backgrounds, ethnicities or different cultural heritages are not disadvantaged when dealing with allergies and food labelling.
- To work with the catering provider/team to establish a robust process and documentation for menu planning, food labelling, storing, avoidance of cross-contamination, stock ordering of food/drink used at the school.
- To provide an effective staff awareness programme on food allergies and intolerances, possible symptoms (anaphylaxis) recognition and actions to take.
- To develop a pupil awareness programme through PHSE and other curriculum areas.

Practical steps

In order to put these principles into practice we will:

Proprietor (Headteacher)

- Ensure the school has a strategic vision for the management of allergy risk assessment and emergency procedures
- Ensure the school's arrangements to identify and safeguard the wellbeing of pupils, because of their own or someone else's allergy, are robust and effective
- Ensure that the school provides appropriate training, information, instruction, induction and supervision on a regular basis to enable everyone to stay safe regarding allergies and their management
- Ensure adequate resources for managing allergies are available
- Ensure appropriate material is available on the school website for parent/carers highlighting how the school is managing pupils with allergies
- Monitor the effectiveness of this Policy to ensure it remains fit for purpose

Senior Leadership Team

- Provide, as far as practicable, a safe and healthy environment in which people at risk of allergic reaction and anaphylaxis can participate equally in all aspects of school life and are not subject to bullying because of their condition
- Ensure all visitors, volunteers, work experience pupils, sub-contractors are made aware of the school's commitment to allergy management as part of Safeguarding

- Ensure the curriculum contains age-appropriate content so all pupils can learn about allergies and how everyone can support those who have them
- Create links at strategic level with Healthcare professionals and ensure at operational level that links are robust
- Ensure that up-to-date allergy information for pupils is accessible to all staff
- Ensure there is a workable School Emergency Plan in place that is known by all staff
- Ensure the school sends a copy of the medical details it holds for the child to parents/carers for review and update at the end of each school year. Seek updated medical information at the commencement of each calendar year and for any pupil/pupil joining in year
- Where the pupil has an Individual Healthcare Plan (IHP), ensure the involvement of healthcare and welfare professionals, teaching, parents/carers and the pupil in establishing IHPs.
- Encourage parents/carers to provide Allergy Action Plans (AAPs) completed and signed by a healthcare professional that can be kept with their medication with copies made available for all staff to access and help the school support the pupil
- Ensure effective communication of individual pupil medical needs to all staff and that they know how and where to check for updated information.
- Ensure there are enough trained staff to meet the statutory requirements and assessed needs, allowing for staff absences away from the school premises
- Ensure First Aid staff training includes anaphylaxis management, including awareness of triggers, anaphylaxis and first aid emergency procedures
- Ensure an adequate risk assessment is undertaken prior to any school trips, excursions or offsite extra-curricular activities for pupils who have allergies
- Ensure records of pupils medically prescribed an AAI and its use are kept correctly
- Ensure pupil documentation and in date medication is kept correctly and safely
- Ensure best practice in the labelling of foodstuffs and their contents

Designated Allergens Lead

- Follow all legal requirements, recommended best practice and whole school procedures pertaining to allergies within the school context
- Report to the Headteacher regarding pupil(s) with allergies

- Lead on the training of staff regarding allergy medical needs and their identification and management
- Work closely with staff preparing food in assisting in the support of pupils with known allergies (including meeting with parents/carers where requested) to discuss any special requirements
- Liaise with parents/carers of pupils with known declared allergies to produce a risk assessment for their child that includes sharing of information, allergy management, risk minimisation and emergency actions.
- Wherever possible use an AAP (allergy action plan) for pupils with recognised allergies and keep it with their medication. Ensure copies of the AAP are available for all staff to access.
- If an additional written IHP (individual healthcare plan) is not required, ensure that the AAP is viewed and treated with the same level of seriousness.
- Ensure all copies of the AAP/IHP located around the school and/or on IT systems are identical if an updated version is received.
- Where an AAP has not been received for a pupil with recognised allergies, or if the medication information is not clear, liaise with GP to obtain an up to date copy and/ or clarification.
- Ensure medication is stored in a rigid box and clearly labelled with the pupil's name
- Be trained in the use of an Adrenaline Auto-Injector (AAI) and be competent in performing any possible required prescribed medical treatment as outlined in the pupil's IHP and/or AAP
- Ensure that any other staff involved with those pupils requiring the use of an AAI are also adequately trained and competent
- Ensure all school trips, excursions or off-site extra curricula activities for pupils are pre-checked so that 'safe' food is provided or that an effective control is in place to minimise risk of exposure for pupils with allergies
- Ensure the school has an audited spare supply of in date AAI's that are kept in a safe space at room temperature that is accessible, secure but not locked away and all staff are aware of the location
- Monitor the use of all AAI's to ensure they are within the expiry date including those brought into the school by pupils or external sources and are of the correct dosage
- Arrange for the correct disposal of out-of-date AAI's

- Where anaphylaxis is suspected in an undiagnosed individual, call the emergency services and state ANAPHYLAXIS is suspected, then follow their advice as to whether administration of a spare AAI is appropriate
- Record all emergency uses of AAIs or reports of suspected emergencies
- Ensure that, if a pupil/pupil notifies school that they are no longer allergic to a food, this information is checked prior to updating records and the IHP (if applicable).

All Staff

- Follow as directed all the requirements of the school, including all legal requirements, recommended best practice and whole school procedures pertaining to allergies within the school context
- Complete appropriate anaphylaxis training and be confident to respond to an allergy emergency
- Raise awareness about allergies and anaphylaxis amongst their pupils in the classroom and around school, especially in dining areas
- Encourage self-responsibility and learned avoidance strategies amongst pupils living with allergies
- Help all pupils understand which foods are safe for those with allergies and how they can support other pupils with specific dietary needs to stay safe
- Highlight the need for anti-bullying of pupils with the condition
- Be aware of the pupils in their care who have known allergies as an allergic reaction could occur at any time, not just at breaks or mealtimes
- Any food-related activities must be supervised with due caution whilst following best practice for storing, preparing, cooking and serving food
- Any staff leading on a school trip must check that they have medication for all pupils with medical conditions, including allergies
- Staff leading a school trip, excursion or off-site extra curricula activity must ensure they carry all relevant emergency supplies with them

Parents/Carers

- Notify the school of the pupil's allergies.
- Inform the school of any changes as soon as known

- Talk with your child about allergy self-management, including what foods are safe and unsafe, how to read food labels, strategies for avoiding allergens, how to spot symptoms of allergy, how and when to tell an adult if experiencing an allergic reaction
- Provide an AAP completed by a healthcare professional that can be kept with their medication and help the school support the pupil
- Contribute to the provision of an IHP in partnership with the school, and relevant healthcare professional, where required
- Provide any other written medical documentation, instructions and medications as directed by a health professional
- If you require it, meet with the staff in charge of catering to discuss any specific requirements relating to your child's allergy (information from these meetings will be recorded by the staff member)
- Be aware of the school Allergens Policy and any arrangements for managing children with allergies and at risk of anaphylaxis
- Communicate regularly with the school to support our ability to keep our children safe and act immediately in the event of an allergic reaction
- Provide appropriate in date medication (two AAIs) of the correct dosage and register their AAIs on the manufacturer's websites to receive text alerts for expiry dates
- Providing appropriate foods to be consumed by the child if necessary
- Replace medications after use or upon expiry
- Review the Policy and procedures with the Headteacher and Member of Staff responsible for medical needs (also Designated Allergens Lead), the pupil's doctor and the pupil (if age appropriate) after a reaction has occurred

Pupil/Pupils with allergies (as age appropriate)

- Have a good awareness of their allergy and support the knowledge of peers in helping keep them safe
- Be proactive in the care and management of their food allergies and reactions and medication
- Be sure not to exchange food with others and take care to avoid any foods which may cause an allergic reaction
- Read food labelling but, if unsure, avoid the food
- Avoid eating anything with unknown ingredients
- Know where their medication is kept

- As soon as they suspect they are experiencing signs of allergic reaction, tell an adult

Supply, storage and care of medication

An anaphylaxis kit which is kept safely, not locked away and accessible to all staff.

Medication should be stored in a suitable container and clearly labelled with the pupil's name. The pupil's medication storage container should contain:

- Two AAls i.e. EpiPen® or Jext®
- An up-to-date allergy action plan
- Antihistamine as tablets or syrup (if included on allergy action plan)
- Spoon if required
- Asthma inhaler (if included on allergy action plan).

It is the responsibility of the child's parents to ensure that the anaphylaxis kit is up-to-date and clearly labelled, however the Designated Allergens Lead will check medication kept at school on a termly basis and send a reminder to parents if medication is approaching expiry.

Parents can subscribe to expiry alerts for the relevant AAls their child is prescribed, to make sure they can get replacement devices in good time.

Storage

AAls should be stored at room temperature, protected from direct sunlight and temperature extremes.

Disposal

AAls are single use only and must be disposed of as sharps. Used AAls can be given to ambulance paramedics on arrival or can be disposed of in a pre-ordered sharps bin. Sharps bins to be obtained from and disposed of by a clinical waste contractor/specialist collection service.

The sharps bin is kept in the medical room.

Spare AAls

Schools can now legally purchase and store spare Adrenaline Auto-Injectors (AAls For children at risk of anaphylaxis). Immediate access to an AAI can be life-saving. While it's vital that families have their own prescribed AAls for their child, having spare AAls at school adds an extra layer of reassurance for everyone involved. It's a step towards creating a safer and more inclusive environment for children managing severe allergies.

Catering

All food businesses (including school caterers) must follow the Food Information Regulations 2014 which states that allergen information relating to the 'Top 14' allergens must be available for all food products.

The Designated Allergens Lead will inform the catering staff of pupils with food allergies.

Parents/carers are encouraged to meet with the Headteacher to discuss their child's needs.

The school adheres to the following Department of Health guidance recommendations:

- Bottles, other drinks and lunch boxes provided by parents for pupils with food allergies should be clearly labelled with the name of the child for whom they are intended.
- The pupil should be taught to also check with catering staff, before selecting their lunch choice.
- As all food is provided by the school, staff should be educated about how to read labels for food allergens and instructed about measures to prevent cross contamination during the handling, preparation and serving of food.
- Food should not be given to primary school age food-allergic children without parental engagement and permission (e.g. birthday parties, food treats).
- Use of food in crafts, cooking classes, science experiments and special events (e.g. fetes, assemblies, cultural events) needs to be considered and may need to be restricted/risk assessed depending on the allergies of particular children and their age.

Allergy awareness and nut bans

The School supports the approach advocated by many allergy charities towards nut bans/nut free schools. They would not necessarily support a blanket ban on any particular allergen in any establishment, including in schools. This is because nuts are only one of many allergens that could affect pupils, and no school could guarantee a truly allergen free environment for a child living with food allergy. They advocate instead for schools to adopt a culture of allergy awareness and education.

A 'whole school awareness of allergies' is a much better approach, as it ensures teachers, pupils and all other staff are aware of what allergies are, the importance of avoiding the pupils' allergens, the signs & symptoms, how to deal with allergic reactions and to ensure policies and procedures are in place to minimise risk.

Risk assessment

The School will conduct a detailed individual risk assessment for all new joining pupils with allergies and any pupils newly diagnosed with an allergy, to help identify any gaps in our systems and processes for keeping allergic children safe.

Training

The Designated Allergy Lead has undertaken relevant training. She will be responsible for delivering in house training on an annual basis or sooner if need dictates. Training will include a basic understanding of allergic disease and its risks which include:

- Knowing the common allergens and triggers of allergy
- Spotting the signs and symptoms of an allergic reaction and anaphylaxis. Early recognition of symptoms is key, including knowing when to call for emergency services
- Administering emergency treatment (including AAls) in the event of anaphylaxis- knowing how and when to administer the medication/device
- Measures to reduce the risk of a child having an allergic reaction e.g. allergen avoidance
- Knowing who is responsible for what
- Associated conditions e.g. asthma
- Managing Allergy Action Plans and ensuring these are up to date

Allergies and bullying

By law, all state schools must have a behaviour policy in place that includes measures to prevent all forms of bullying among pupils, and although SwitchED2 is not a state school, this is a policy it agrees to abide by. All teachers, pupils and parents will be told what it is, and allergy bullying should be treated seriously, like any other bullying.

Schools must, under Section 100 of the Children and Families Act 2014, aim to ensure that all children with medical conditions, in terms of both physical and mental health, are properly supported in school so that they can play a full and active role in school life, remain healthy and achieve their academic potential.

The school will have regard to the current Department for Education guidance Keeping Children Safe in Education and Supporting Pupils at School with Medical Conditions.

Information on allergies

The most common causes of food allergies relevant to this Policy are the fourteen food allergens:

- Cereals containing Gluten
- Celery
- Crustaceans
- Eggs
- Fish
- Soya
- Milk
- Nuts
- Peanuts
- Mustard
- Sesame Seeds
- Sulphur dioxide/Sulphites
- Lupin
- Molluscs

However, it is possible that any food has the potential to cause an allergic reaction. Contact with any food or materials containing a child's allergen has the potential to cause an allergic reaction for that child.

Latex, chemicals, medicines, grasses, pollen, weeds, trees, pets, insect venom and animal dander (shed flakes of skin) can also cause allergic reactions.

Symptoms

Mild to moderate symptoms include:

- Swelling of the eyes, face and lips
- Runny or congested nose
- Raised itchy rash (hives), eczema flare, skin flushing
- Itchy mouth
- Stomach cramps, nausea, vomiting, diarrhoea

Severe symptoms include:

- Swollen tongue, hoarse voice or cry, difficulty swallowing and talking
- Chest tightness
- Breathing difficulties, persistent cough, wheeze
- Low blood pressure, feeling faint, collapse
